

OBJECTIVE

Results-driven MERN Stack Developer with a robust background in designing, implementing, and maintaining web applications. Proficient in utilizing MongoDB, Express.js, React.js, and Node.js to deliver scalable and responsive solutions. Skilled in collaborating with cross-functional teams to ensure the timely delivery of high-quality software. Demonstrates a strong attention to detail, a passion for clean and efficient coding practices, and staying current with emerging technologies. Proven ability to troubleshoot, problem-solve, and optimize application performance. Eager to apply technical expertise to innovative projects and contribute to continuous improvement within a dynamic development environment.

SKILLS

Technical Architecture: MVC, RESTFUL API Design.

Programming Language: JavaScript, Typescript

Frontend Technologies: HTML, CSS, React.js, Angular, Bootstrap CSS, Tailwind CSS, Material UI.

Backend Technologies: Node.js, Express.js

Database: MongoDB, MySQL

Cloud Service: Aws S3 bucket, Cognito Service.

Development Tools: Visual Studio Code, Postman.

Source control: GitHub, Git

CREDENTIALS

- Bachelor of Commerce.
- Currently working as a Software Engineer in developing software web applications development and maintenance.

SPECIALIZATION

- Design, Development and Deployment of web applications in **MERN Stack Technologies** using React.js, Node.js, express.js, MongoDB, HTML, Bootstrap CSS
- Proficient in building robust, scalable APIs using Node.js and Express.js, integrating with MongoDB for database management
- Experienced in handling server-side logic, RESTful API development, middleware integration, and database operations.

PROFESSIONAL EXPERIENCE

*RapidQube Digital Solutions Pvt. Ltd. Mumbai*

*Position: Software Engineer (Nov 2023 – Present)*

**About The Projects: -**

**ContractPro**

*February2024 to Till Date*

*Node.js, React.js, Express.js, MongoDB, Mern Stack*

- Developed application by using React.js to create user interface
- Designed and implemented secure, scalable RESTFUL APIs using NodeJS and Express.js, ensuring efficient communication between frontend and backend services.
- Architected and optimized the MongoDB database schema for efficient data storage and retrieval & S3 bucket for file storage.
- Developed a workflow-based system to manage complex operations, including multi-step processes, task management, and stage transitions, improving the overall structure and execution of backend processes.

**Professional Online Editing Tool (POET)**

*November2023 to February2024*

*Node.js, React.js, Express.js, MongoDB, Mern Stack*

- Designed and implemented secure, scalable RESTFUL APIs using Node.js and Express.js, ensuring efficient communication between frontend and backend services.
- Architected and optimized the MongoDB database schema for efficient data storage and retrieval
- Integrated two-factor authentication (2FA) using JWT to enhance security, alongside role-based access control and security purpose.
